

Digital Veterinary weighing scales for dogs and cats 150kgs

The veterinary scale is specially equipped for the needs of veterinary medicine. Thanks to the low weight of just 17 kg, the animal scale can also be used as a mobile scale. With a readability of 50g, the veterinary scale is suitable for cats or dogs, as well as sheep and other animals up to a maximum of 300 kg. The Accurate veterinary scale is used in veterinary medicine (vets, animal shelters, zoos, breeders, etc.).

Veterinary scale made of stainless-steel Platform design

Thanks to the low height, the veterinary scale can also be accessed by older or sick animals without any problems. The veterinary scale has a bright backlit LCD display which shows the precise weight. Due to a special animal weighing programme, accurate and stable results can be displayed even with restless animals.

A 1.6 m long / stretchable spiral cable is attached to the scale display of the veterinary scale. For stationary use, the weighing terminal of the veterinary scale can be attached to the wall using the wall bracket included in the scope of delivery.

The veterinary scale is supplied with a power supply unit. For mobile use, the veterinary scale can be equipped with batteries (battery life up to 60 hours).

Features

- Two weighing ranges: up to 150 | 300 kg with resolution: 50/100g
- Platform size 950 x 500 mm
- Sturdy stainless steel weighing platform hygienic and easy to clean
